Byron College

## Summer Programme 2017

### *Destination UK at Byron College*

#### *Introduction*

**Are you ready to embark on a fun, creative and adventurous summer trip?**

Our 'Destination UK' summer programme at Byron College will take you on an exciting tour around the United Kingdom and guide you through the magnificent landscapes, the rich culture, the food, the everyday life and the technological contributions that this amazing place has to offer.

This summer, children at Byron College will become acquainted with British life in years gone by, travelling through history and learning about legendary kings and heroes. They will also learn to love and protect the world around us through hands-on **Environmental Science** time or explore their own scientific talents during our **STEM** (*Science, Technology, Engineering and Mathematics*) sessions!

Inspired by different regions of the United Kingdom, they will discover its hidden secrets and enjoy this full-immersion summer programme which combines splashing around the swimming pool and other fun athletic events with engaging and culturally enriching activities!

**Cornwall**

**Warwickshire**

**Yorkshire**
